Summary

I am a passionate frontend developer with expertise in building responsive and user-friendly web and mobile applications using **ReactJS**, **React Native**, and **Flutter**. Skilled in modern **JavaScript** and **TypeScript**, I leverage state management tools like **Context API** and **Zustand** to create efficient and maintainable applications. With a strong foundation in **UI** design using **Sass**, **SCSS**, and **Tailwind CSS**, I deliver clean and visually appealing interfaces. Experienced in e-commerce and admin panel projects, I collaborate effectively in **Agile environments**, utilizing **Git** for version control and integrating **RESTful APIs** for backend connectivity. Committed to continuous learning and delivering high-quality solutions, I excel at managing time and tasks efficiently in fast-paced development settings.

Experience

Software Developer

Spider Techno Soft Pvt Ltd • Kochi, India

09/2023 - 09/2025

- Proficient in modern frontend frameworks including ReactJS, Next.js, React Native, and Flutter for developing responsive and high-performance web and mobile applications.
- Experienced in building static and dynamic web app, e-commerce platforms and admin panels, focusing on intuitive UI/UX design, scalability, and seamless user experiences.
- Skilled in state management using Context API, React Query and Zustand, ensuring efficient and maintainable data flow.
- Utilized Tailwind CSS and Sass to design clean, responsive, and visually appealing user interfaces with consistent styling and reusability.
- Integrated RESTful APIs with React Query for real-time data synchronization, authentication, and backend connectivity.
- Developed cross-platform mobile applications with React Native and Flutter, ensuring consistent performance across Android and iOS.
- Collaborated with backend teams using Node.js, optimizing API communication and overall application efficiency.
- Proficient with Git/GitHub, responsive design practices, and modern deployment workflows.
- Strong understanding of component-based architecture, modular design, and frontend performance optimization best practices.

Junior React Developer

iAntz IT Solutions • Thiruvananthapuram, India

07/2022 - 06/2023

- Developed and maintained web applications using React.js, focusing on building responsive and user-friendly interfaces.
 - Designed and implemented UI components for educational and static web applications, ensuring accessibility and smooth user interaction.
 - Utilized HTML5, CSS3, and ES6 JavaScript to deliver clean, optimized, and maintainable code.
 - Worked with Material Design libraries and modern styling frameworks to create visually consistent and professional designs.
 - Managed application state efficiently using Context API and Zustand, ensuring predictable data flow.
 - Collaborated in Agile development environments, participating in sprint planning, code reviews, and version control using Git.
-

Skills

Communication Skill, Time Management, Javascript, Typescript, HTML5, Tailwind CSS, CSS, SASS, React JS, React Native, Flutter, Node JS, Next JS, REST APIs, GIT, Agile Software Development, Scrum Software Development, JIRA, Podman, Microsoft Office, MongoDB, Tanstack Query, Tanstack Router, Zustand, Python

Education

FH OÖ University of Applied Sciences Upper Austria

Master's in Interactive Media • Hagenberg im Mühlkreis

I'm currently studying my first semester, where I'm learning Hypermedia UX (using React and Vue), C++ for game development, Human-Computer Interaction, and Artificial Intelligence. I'm building a strong foundation in both front-end development and intelligent systems as I begin my journey in tech.

AP J Abdul Kalam Technical University

Bachelor's Degree in Computer Science and Engineering • Thiruvananthapuram, India

06/2023

I began my programming journey by learning the fundamentals of **Python** and **C**, later advancing to **C++** and **Java**. During my college years, I worked as a freelance developer, creating responsive static web applications using **ReactJS**. For my bachelor's degree project, I developed a Python-based voice assistant named "**Chris Go**", designed to control and interact with the computer through voice commands, allowing users to perform a wide range of tasks efficiently. My main project was a Time Management and Scheduling Calendar application named "**Metavanator**", developed using **AngularJS** and **Firebase**. The software functions similarly to Google Calendar, enabling users to set reminders, schedule tasks, and manage their daily activities effectively.

Languages

Malayalam (Fluent), English (Professional), Tamil (Conversational), Hindi (Conversational), German (Beginner – Just Started)

Certificates

Bachelor of Technology in Computer Engineering, Workshop on Kutty Pi, Foss Young Professional Meet 18-19, Beginner Guide to How to Make a Game with Unity, Introducing Coding For Beginners : Html And CSS Online, Bootstrap and PHP Blog Tutorial Step By Step, AWS Academy Graduate - AWS Academy Cloud Foundations, An Interactive Javascript Course for Beginners, Training on Ethical Hacking and Cyber Security, Get Started In Crypto currency Investing
